1. **This is when the front end is running but the back end is not yet started:**

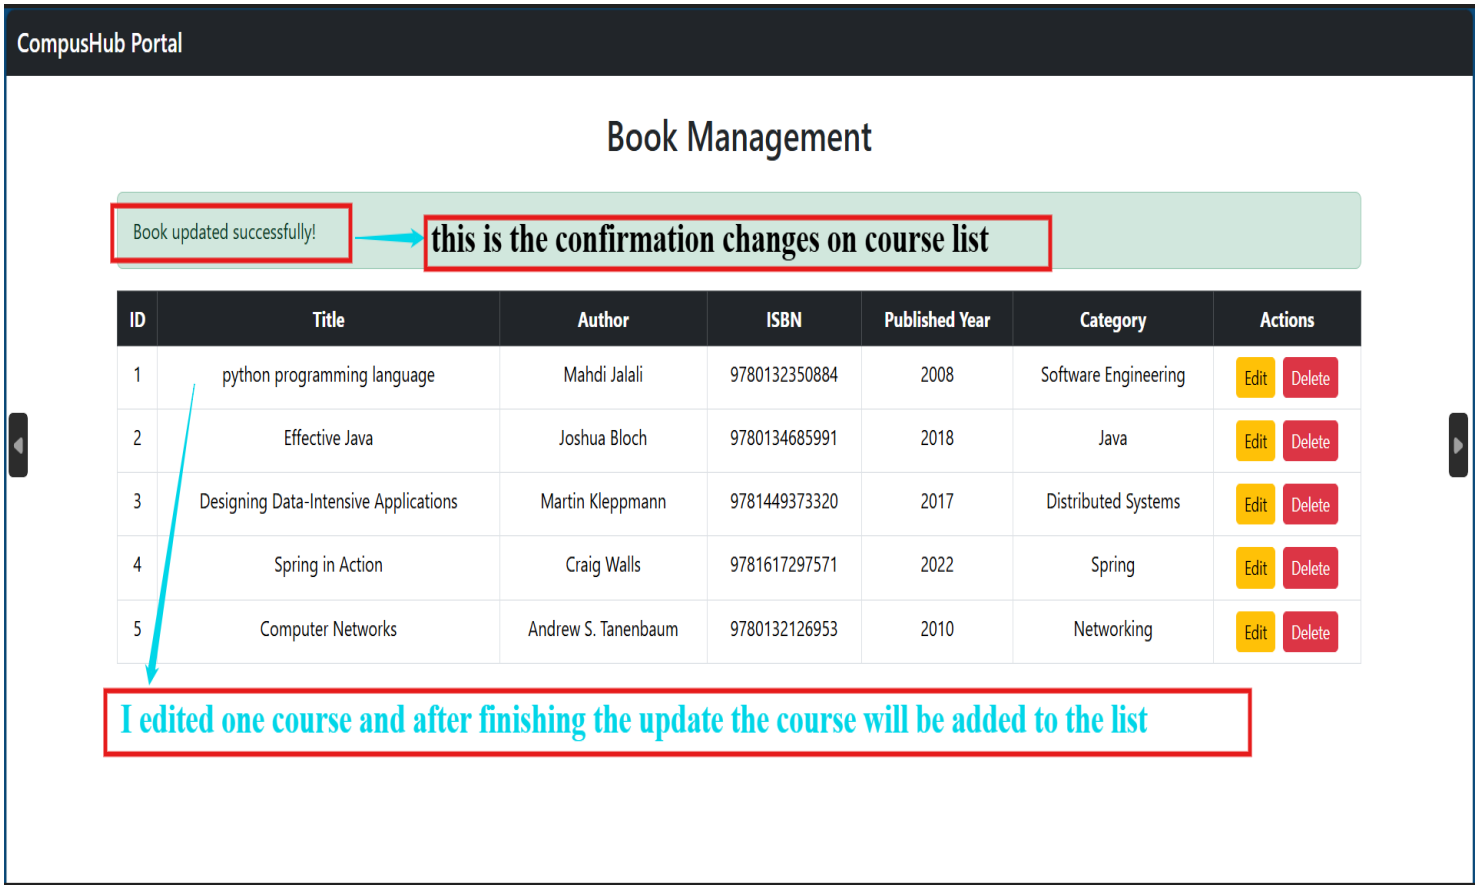

2. **This is when the back end is starting and the course content is loaded to the front end:**

3. **Here we have two options for each course either to update them or deleting them from the course list:**

4. **First start with updating an course content and the result is submitted fine:**

5. **The deleting option also works and the course is not available after submitting the deletion actions:**
